

ASAP CRN Cloud Release

Minor Release DOI: [10.5281/zenodo.19740716](https://doi.org/10.5281/zenodo.19740716)

README - Release [v4.1.0](#)

Overview

The ASAP CRN Cloud is pleased to announce the **4.1.0** release of data. This release adds 18 new un-curated Mass Spec (MS) derived -omics Datasets from Teams Lee and Alessi, and version bumps 14 previously released PMDBS Datasets. These new MS Datasets include proteomics, lipidomics, and metabolomics from various mouse tissues.

The updated Datasets to fix inconsistencies in the ASAP assigned `ASAP\_subject\_id` and `ASAP\_sample\_id` for previously released PMDBS Datasets. These erroneously included the string "PMBDS", now replaced with "PMDBS". The version bump captures the Dataset Metadata changes for all 14 Datasets (including the aggregated 'asap-cohort' datasets). The three PMDBS Collections were also version bumped to reflect the updated Datasets.

Collections

1. **PMDBS scRNAseq Collection, v3.1.1** - DOI: [10.5281/zenodo.19876217](https://doi.org/10.5281/zenodo.19876217)
2. **PMDBS Bulk RNAseq Collection, v1.2.1** - DOI: [10.5281/zenodo.19876662](https://doi.org/10.5281/zenodo.19876662)
3. **PMDBS Spatial RNAseq Collection, v1.1.1** - DOI: [10.5281/zenodo.19876627](https://doi.org/10.5281/zenodo.19876627)
